General notes to members

1. All notes which are not part of the questionnaire and intended only for members (for example, translation notes) are enclosed in pointed, angle brackets <like these>.

2. All the elements in questions which require local adaptation are enclosed in square brackets. These instructions often relate to adding the name of the relevant country. For example, in Britain “Generally, how would you describe taxes in [Country] today?” would read “Generally, how would you describe taxes in Britain today?”

3. All the elements in questions which are optional are enclosed in double round brackets ((like these)).

4. Q-numbers in parentheses – for example (Q1 1996): question numbers in 1996 questionnaire. For countries who participated in 1996, please use the same wording for these questions as you did then. (N) = new in 2006.

5. Translation and clarification notes are provided after the relevant question.

6. In general, if translators have difficulty when translating answer codes, they should focus upon translating the concepts expressed by the codes rather than the precise words used.

7. In 1996 no general translation note was provided as to what we meant by ‘government’. Unless there are very strong reasons not to, countries who participated in 1996 should use the same wording for ‘government’ as they did then. In general, by government we mean the central regime within a country (that is, any government that has been elected into power). In some countries the meaning of questions which refer to ‘government’ can be improved by adding ‘of any party’ after ‘government’ (to stress that it does not necessarily have to be the current government).
(Q1 1996)

1. In general, would you say that people should obey the law without exception, or are there exceptional occasions on which people should follow their consciences even if it means breaking the law? (✓)
