

## ***Finding full-text articles in the Canadian Business and Current Affairs database***

Martha Attridge Bufton

March 2020

This short video shows you how to filter for full-text versions of peer reviewed articles in a database available in the Carleton University Library. Full-text articles are those that are available in an electronic or digital format (such as a pdf or an html file).

We will start on the library home page at [www.library.carleton.ca](http://www.library.carleton.ca).

Then we will click on the Databases link underneath the main search field. Let's say we are interested in finding a full-text, peer reviewed article in Canadian Business and Current Affairs.

Using the alphabet, we will click on C and then scroll down to Canadian Business and Current Affairs database.

Then we will click on the link to Canadian Business and Current Affairs database. If we are off campus we will be prompted to log into the system.

Now that we are in the database, let's say we are interested in peer reviewed articles related to Canada and climate change.

We will use Canada and climate change as key words in the search fields.

Then we will click on the peer reviewed filter and then on the right-hand side of the page, we will click on Search.

We get a number of results and now we can use the filters in the left-hand navigation to narrow our search to full-text, peer reviewed articles.

In the left-hand navigation, under Limit to, we will click on Full text. And then under Source type, we will click on Scholarly Journals.

Now we have a list of full-text articles peer-reviewed journal articles from which to choose.

So, to recap, you can do a search in many databases available from the Carleton University Library. Canadian Business and Current Affairs is one example. In these searches, you can find full-text articles by filtering your search using the full-text filter and you can also filter for peer reviewed journal articles using the peer reviewed filter and the Scholarly Journals filter.

This is the end of this video.
